EDUCATION

Exchange Program in Data, AI & Analytics (DIA)

Aug 2025 – Apr 2026

ESILV École d'Ingénieurs Léonard de Vinci, Paris

Relevant Coursework: Machine Learning (**17/20**), Deep Learning, **NLP**, MLOps, Programming for Data Science

Specialisation Track in Artificial Intelligence

2024 – 2025

Shanghai Jiao Tong University (SJTU)

Relevant Coursework: **Transformers**, GANs, Large Language Models, Agentic AI, Computer Vision

Bachelor of Science in Computer Science and Technology

2022 – 2026

Shanghai Normal University (SHNU)

Relevant Coursework: Linear Algebra, Probability Theory, Data Structures & Algorithms, Database Systems, Operating Systems

PROJECTS

OEE Prediction for Smart Manufacturing Lines

2025

github.com/YUu-8/OEE-Prediction-for-Production-Lines

- Designed and implemented a binary classification pipeline on industrial time-series sensor data using **IBM Watsonx**, achieving **99.8% accuracy**; applied **LIME** for model interpretability and explainability.
- Performed feature engineering on raw sensor streams to predict equipment efficiency failures under an OEE framework.
- Top 10** finish at IBM AI Hackathon (LLM-Based Enterprise Efficiency Solutions, Paris) – **2025**.

ML Analysis of F1 Fastest-Lap Circuits

2025

github.com/YUu-8/ML-Analysis-of-F1-Fastest-Lap-Circuits

- Developed an end-to-end machine learning pipeline in **Python** (pandas/NumPy) to model fastest-lap average speed from circuit geometry features.
- Integrated heterogeneous data sources (Kaggle circuit data and **FastF1** telemetry) via fuzzy matching and linear interpolation; managed experiment reproducibility with **Git**.
- Trained and evaluated multiple regressors (Linear Regression, Random Forest, XGBoost) under a unified cross-validation protocol, achieving **$R^2=0.92$** ; deployed optimal model as a REST API (**FastAPI** + **Docker**) with automated CI/CD via **GitHub Actions**.

EXPERIENCE

Third Research Institute of the Ministry of Public Security (ISPRC)

Jul. – Sep. 2024

Technology Transfer & Commercialization Intern

Shanghai, China

- Data curation:** Curated and standardised **100+** heterogeneous research & patent records using Python and Excel to produce audit-ready datasets for technology transfer due diligence.
- Technical briefs:** Authored **15+** AI/cybersecurity technical briefs to support commercialisation feasibility assessments across inter-departmental decision processes.

EXTRA-CURRICULAR ACTIVITIES

- 3rd Prize**, SJTU AI Summer Camp (Text-to-Image Fine-Tuning via LoRA, ModelScope) 2024
- Teaching Assistant, SJTU — Orange Pi Embedded Systems Laboratory 2024
- WCUBA Team Member — Shanghai Municipal **1st Prize** (Basketball) 2024

SKILLS

Programming: Python, SQL, Java **ML/DL:** PyTorch, Scikit-learn, XGBoost **Tools:** Linux, Git, Docker, FastAPI

MLOps: GitHub Actions, CI/CD pipelines **GenAI:** Transformers, LoRA, LangChain **Visualisation:** Matplotlib, Seaborn, Plotly, Tableau **Languages:** English (proficient, IELTS 6.0), French (B1, in progress)
